

Wi-Fi printing

Android device users

Once you are connected to the library Wi-Fi, open a browser. Input the following in the URL address bar:

<http://wifi>

*Google Chrome can be downloaded for free from Google

The netloan Wi-Fi print webpage will repeat the following instructions, giving you the relevant links where needed – just follow the steps in your browser.

- 1) Make sure you have a Google account – you'll need your username and password.
- 2) Download the latest version of Cloud Print from Google Play.
Use the back button on your device to return to the netloan Wi-Fi print instruction page
- 3) Register for netloan Wi-Fi print – you'll need your library membership username and PIN.
- 4) Link to the Wi-Fi printer in the library. Use the back button on your device to return to the netloan Wi-Fi print instruction page.

You're now ready to print from your laptop!
